Brakeman Frank B. Avery of Groton Killed by Extra Freight—Schools to Observe Lincoln Centenary—Stallion Silver Staff Going to New York.

Frank B. Avery, 33, of Groton, a brakeman on extra freight No. 110, was instantly killed in the local yards just before four o'clock Friday afternoon.

His train, known as the drop local, was backing a pair of steel cars up upon the siding just south of the Providence street bridge when the accident occurred. Avery was riding between the cars, which were loaded and attached to the engine.

He evidently slipped while descending and fell upon the track. The truck of the engine next to the engine passed over him, severing the body diagonally across from the right shoulder.

The back of his head was also cut off by the wheels.

The body was placed on a stretcher by members of the train crew and taken down to the round house.

The corner, Dr. J. B. Kent viewed the body, which was later taken in charge by L. E. Smith.

It was well known among local railroad men and his death is keenly felt among them. He leaves a wife and two children resident in Groton.
